PAGES 2 ENCLOSURES (NO. & TYPE) 1 - sketch on ditto

REMARKS \_\_\_\_\_

This is UNEVALUATED  
Information

25X1

25X1

1. Between 0930 and 1500 on 25 May 1955, about 6 take-offs and landings were made by Il-28s which were parked in the southwestern corner of Werneuchen airfield. The aircraft  made local flights. A total of 48 Il-28s or U-Il-28s were parked at the field being arranged as follows: 39 aircraft in front of the hangars and 9 in the southwestern corner.  25X1  
 One Li-2 and 1 high-wing monoplane were parked in front of the flight control station. <sup>1</sup> 25X1

2.  25X1

3. No changes were observed on the radio installations east of the airfield. South of the eastern end of the runway were 2 radio trucks including one with a mast about 5 meters high. The masthead mounted a frame similar to a half opened umbrella without cover. At this site, the masts with the egg-shaped device had previously been located. The Kniferest-type and Fishnet-type sets were still observed in the eastern curve of the southern taxiway. A new installation with a model AA 4 MK 3 set in the middle was located south of aircraft revetment No 1. About 2 meters north of this installation was a 3-meter-high mast which seemed to have no guy wires. Two masts about 3.5 meters high and 4 meters apart were located 6 to 8 meters southwest of the AA 4 MK 3 set. Each mast was braced once at medium height. A Fishnet-type set was observed 6 to 8 meters northeast of the AA 4 MK 3 set, and about 10 meters north of this set were two masts, about 2.5 meters high, without guy wires, and each mounting a round device which was about 10 cm in diameter. <sup>3</sup>
4. Seven AA guns were observed in the AA gun emplacement in the northwestern section of the field. About 20 men received instruction on one gun. **FLASH (21)**

25X1

-2-

About 10 meters south of the emplacement were 4 soldiers with flags with which they pointed in specific directions while searching the sky. The AA gun was turned in these directions. Two large van-like trucks and about 30 trucks were parked in the two sheds near the emplacement. Three 37-mm AA guns were observed in the AA gun emplacement in the southeastern section of the field. 4

5. At about 0815 on 25 May, about 30 air force officers ranking from lieutenant to major and much luggage arrived with the passenger train at Werneuchen railroad station coming from the direction of Wrietzen. The officers who did not wear specific insignia were picked up at the station by truck [redacted]

25X1

25X1

6. A brick building, about 15 x 10 meters, with a roofing paper was under construction near the northwestern entrance to the field, about 100 meters from the northwestern AA gun emplacement. Water pipes were being laid from the direction of Werneuchen along the road to Tiefensee, and presumably north of the AA gun emplacement into the area of the field.

25X1

7.

25X1

1. [redacted] Comment. It is believed that Werneuchen airfield is still occupied by 25X1  
2 bomber regiments equipped with about 50 Il-28s or U-Il-28s. [redacted]

25X1

2. [redacted] Comment. For sketch of rudder assembly of Il-28 [redacted], see Annex. 25X1  
The bulge in the upper section of the rudder assembly was observed for the first time. 25X1

3. [redacted] Comment. The inner and outer low frequency approach beacons and the PKV-45 DF station were observed at their previous locations east of the field. 25X1  
The radar station with the Kniferest-type and Fishnet-type set is still located in the eastern section of the southern taxiway. As previously observed, a model AA 4 MK 3 set was seen near the AA gun emplacement in the northwestern section of the field next to the Fishnet-type set that was observed by the same source [redacted] The locations of the 25X1  
radio installations with egg-shaped devices or umbrella-type antennas presumably change repeatedly.

4. [redacted] Comment. The AA gun emplacement in the northwestern section of the field is occupied by 85-mm AA guns and the emplacement in the southeastern section by 37-mm AA guns. 25X1
